

Career Plus Job Recruitment Website

Project Overview:

Career Plus is a comprehensive job recruitment website designed and developed to facilitate seamless interaction between companies and candidates. The platform offers user-friendly dashboards for both companies and candidates, empowering them to manage job postings, applications, and profile information efficiently.

Key Features:

Company Dashboard	Candidate Dashboard
Manage company profile and settings.	Create and manage candidate profiles.
Create, edit, and delete job postings.	Search and apply for job openings.
View and manage job applications	Track application status and communication with companies.

Contributions:

Backend Development:

- Designed and implemented database schema.
- Developed server-side logic using PHP.
- Implemented authentication and session management.
- Integrated database operations for CRUD functionalities.

Frontend Development:

- Designed user interfaces using HTML, CSS framework.
- Implemented dynamic content rendering using JavaScript and jQuery.
- Ensured responsiveness and cross-browser compatibility.
